EDUCATION

B.S. in Computer Science | software engineering | minor data science Aug 2028
University of North Carolina at Charlotte | Charlotte, NC

Associate of Science in Computer Science | Durham Technical Community College | Durham, NC May 2026
Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Java Programming, Calculus I & II, Chemistry I & II

TECHNICAL SKILLS

Programming Languages: Python, Java, Swift, HTML, CSS, JavaScript
Tools & Technologies: Git, GitHub, Visual Studio Code, Eclipse, Xcode, iOS Simulator, , Django, AWS (EC2), Linux, https, http, SSL
Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), DOM Manipulation, Software Development Lifecycle

PROJECTS

All United FC — Full Stack Web Application *Python, Django, JavaScript, HTML, CSS, SQL* **GitHub**

- Engineered a full-stack club management platform using Django and JavaScript to automate roster management and match tracking for an adult recreational team, eliminating 100% of manual standings updates.
- Designed 3 REST API endpoints with Django REST Framework (DRF) to deliver live JSON data to the frontend, achieving seamless page updates with zero full-page reloads.
- Built dynamic roster UI and media pipeline using JavaScript DOM manipulation and Django media storage, displaying 20 custom player profiles that update automatically upon admin edits.
- Architected and executed AWS cloud deployment for the application using EC2, Nginx, and Gunicorn to transition the platform from local development to a production-ready environment, archiving 20ms average response time.
- Deployed with https and SSL thru Cloudflare domain. This will help 100% on local team to see soccer schedule.

PACS & Medical Imaging Integration *Orthanc PACS, DICOM, Virtual Machines*

- Built and configured** a centralized Orthanc PACS by establishing DICOM networking with UMED-PACS01, enabling centralized storage and viewing of imaging studies.
- Connected patient and imaging workflows** between OpenEMR and Orthanc by matching patient records, imaging orders, and DICOM studies for consistent patient-study association.
- Automated imaging workflows** with Python and the Orthanc REST API, simulating imaging activity across clinic devices with over 20+ test study DICOM uploads.

Full-Stack Contact Manager | **Java** | **JavaScript** | **HTML** | **CSS** **GitHub**

- Built a dynamic contact management app by implementing JavaScript DOM manipulation, eliminating the need for page reloads and improving user experience.
- Designed an efficient data layer using Java HashMap, enabling fast storage and retrieval of contact records across the application.
- Increased data reliability by adding input validation and phone number formatting, reducing user errors before submission.

EXPERIENCE

IT Volunteer | **Durham, NC** March 2026 - Aug 2026
Durham Technical Community College

- Configured and maintained computer workstations and software applications, supporting 100+ students in campus labs.
- Resolved hardware, software, and network connectivity issues in a fast-paced academic environment.

World Relief | **Durham, NC** Aug 2023 - Aug 2026
Youth fellow.

- Mentored 15+ K–8 refugee students weekly, supporting academic growth and improving homework completion rates.
- Introduced students to foundational computer and coding concepts, improving digital literacy and problem-solving skills.
- Guided 10+ high school students through the college application process, including personal essays and financial aid forms.

LEADERSHIP

Computer Science Student Leader Aug 2024 - May 2026
Durham Technical Community College | Durham, NC

- Assisted classmates with Java programming, algorithms, and technical coursework, helping 5+ students improve their grades and confidence.

- Organized study groups and peer learning sessions to foster collaboration across CS courses at least 2 days a week.
